

## VUELIVE Video Conferencing

**VUELIVE Video Conferencing** is a web-based video conferencing solution that is seamlessly integrated into existing web applications such as audio conferencing, e-learning, social networking, or multi-party collaboration. Virtually any development team can easily add a one-click video conferencing feature without knowing anything about video technology or its bandwidth.

### **Why VUELIVE Video Conferencing for your LIVE video conferencing solution?**

- VUELIVE Video Conferencing can be easily integrated into your existing web-based products and services portfolio
- VUELIVE's core technology, Lightning Strike™, is considered one of the best in the world for delivering high quality video at very low bandwidths
- VUELIVE's solutions are scalable and can easily expand to meet the needs of your growing business
- VUELIVE Video Conferencing allows clients to customize the viewer experience in an infinite number of ways through open interfaces that allow branding of the conference meeting page

### **VUELIVE Video Conferencing offers solutions for a wide range of business applications for your clients:**

- Collaborate with clients, team members, partners, and suppliers regardless of their location
- Effectively manage complex projects that involve multiple stakeholders
- Increase visibility by showcasing products and services to prospects, leads, and analysts more frequently
- Proactively navigate a crisis by getting out ahead of the news and informing stakeholders
- Experience in-person and on-site meeting benefits without incurring the travel inconveniences and costs

**With VUELIVE Video Conferencing, use the power of face-to-face interaction that simple audio conferencing can't provide to increase engagement and accountability!**

# VUELIVE Video Conferencing
